

“Globo Hydro Power”

Hydrogen Retail Point New Business Opportunity

“Official Licenses” for Retailers of Hydrogen utilised in the **Globo Hydro Power** process are now available . . .

Hydrogen is utilised as a fuel enhancer within the **Globo Hydro Power** process to create a fuller burn of fossil fuel as utilised in the operation of internal combustion engines.

Motor vehicles are the first application for **Globo Hydro Power**, with all types of internal combustion engines to follow over time.

Globo Hydro Power as a fuel enhancer achieves up to 50% savings in fuel costs and up to 45% reduction in negative greenhouse emissions.

Globo Hydro Power as a fuel enhancer works with Petrol, LPG and Diesel fuels.

Globo Hydro Power as a product is to be commercialised 1st September 2009.

Engine adaptations that allow motor vehicles to accept hydrogen as a fuel enhancer will be conducted by “Official Installers” of **Globo Hydro Power**, and they will be Auto Mechanics and/or Auto Electricians firstly, thereafter they will be an Authorised Installers of **Globo Hydro Power**.

Hydrogen sales will be an on-going need for End-Users of **Globo Hydro Power**, with an average need being 1 cylinder per month.

Retailing of hydrogen as utilised in the **Globo Hydro Power** process is to be a “Swap and Go” system, just as the BBQ gas systems operates at Retail Points.

Retail Points for hydrogen as utilised in the **Globo Hydro Power** process will be “Official Hydrogen Retail Points” licensed by **Globo Hydro Power Limited**.

Insurance Coverage for product and personal liability to the value of \$20m is undertaken by Globo Hydro Power Limited, protecting “Official Hydrogen Retail Points” against the risk of claims relating to the product and/or personal injury proven to be connected with **Globo Hydro Power**.

Regulatory adherence associated with installation of **Globo Hydro Power** and the usage of hydrogen has been addressed by Globo Hydro Power Limited, with permissible usage notations publicly available for review in the “Due Diligence” on the **Globo Hydro Power** website.

Hydrogen has a recommended retail price of 2 cents per litre, or \$60 per cylinder, as applicable to the **Globo Hydro Power** process.

Licenses to become an “Hydrogen Retail Point” are available from Globo Hydro Power Limited the parent company commercialising Globo Hydro Power (the product) for \$245 per month, over a 12 month plan – noting that license fees are a claimable taxation expense, thus reducing the cost to your business by up to 30%.

Being an “Official Hydrogen Retail Point” brings the benefits of:-

- Opportunity to be a Supplier of hydrogen for the **Globo Hydro Power** process, as such improving customer traffic flow into your business.
- “Authorised Retailer Status”, whereby active referral to your business will be achieved from marketing and promotional campaigns associated with **Globo Hydro Power** – noting hydrogen sales will only be available through “Official Hydrogen Retail Points” licensed by Globo Hydro Power Limited.
- \$5.00 sales commission from each cylinder of hydrogen sold will be retainable by the “Official Hydrogen Retail Point”.
- Delivery of full hydrogen cylinders to and removal of empty cylinders from your business premises.
- Retail signage for promotional purposes.
- Promotional material on **Globo Hydro Power** for distribution to your customers.
- Invaluable opportunities for customer loyalty, as End-Users of **Globo Hydro Power** will frequent Service Stations that provide both “Fuel” and “Hydrogen”.

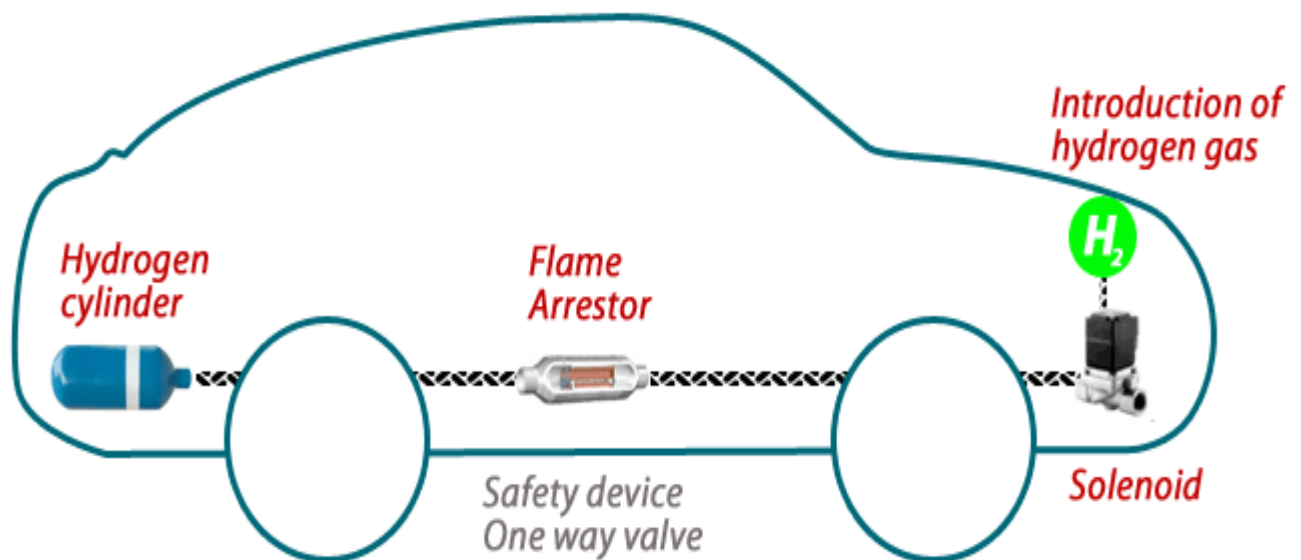

Demand for “Official Hydrogen Retail Points” is arising now, as customers wanting to take up the benefits of **Globo Hydro Power**, are going to the **Globo Hydro Power** website to find “Hydrogen Retailers” in their business and/or residential locality, will your business name be there?
