

“Globo Hydro Power”

Official Installer New Business Opportunity

“Official Licenses” for Installers of **Globo Hydro Power** (the product) are now available . . .

Auto Mechanics and/or Auto Electricians are the only qualified persons permitted to install **Globo Hydro Power**, and only “Officially Licensed Installers” are recognised by Globo Hydro Power Limited and their associated Insurance Companies – other persons and/or business organisations illegally installing **Globo Hydro Power** will be prosecuted for breach of patent usage.

Globo Hydro Power or Global Hydrogen Power as its best described is to be commercially released on 1st September 2009 for sale to Fleet Operators, Business Operators and Owners, and thereafter to the General Public.

Globo Hydro Power is an active fuel enhancer for Petrol, LPG and Diesel engines, with initial promotion of application in motor vehicles.

However, **Globo Hydro Power** is a positive fuel enhancer for any fossil fuelled internal combustion engine, and it will be made commercially available for the purpose of farming equipment, marine vessels and generators in the not too distant future.

Globo Hydro Power as a fuel enhancer achieves up to 50% savings in fuel costs and up to 45% reduction in negative greenhouse emissions, as proven and verified in R&D testing.

No design change and no operational change to a motor vehicle is required to install the **Globo Hydro Power** process, it’s a minor engine adaptation only, taking approximately 1 to 1.5 hours in installation time.

Training in the installation process is provided to “Officially Licensed Installers” of **Globo Hydro Power**, with an on-going help-desk available for installation guidance if needed by “Official Installers”.

Insurance Coverage for product and personal liability to the value of \$20m is undertaken by Globo Hydro Power Limited, protecting “Official Installers” of **Globo Hydro Power** against the risk of claims relating to the product and/or personal injury proven to be connected with **Globo Hydro Power**.

Engine Warranties are applied to all installations of **Globo Hydro Power**, protecting “Official Installers” of **Globo Hydro Power** against the risk of claims proven to be connected with **Globo Hydro Power**.

Parts utilised in installation of the **Globo Hydro Power** are all warranted by the Australian Supplier, protecting “Official Installers” of **Globo Hydro Power** against the risk of claims relating to faulty parts connected with **Globo Hydro Power**.

Regulatory adherence associated with the installation of **Globo Hydro Power** has been addressed by Globo Hydro Power Limited, with permissible usage notations publicly available for review in the “Due Diligence” on the **Globo Hydro Power** website.

Globo Hydro Power has a recommended (starting) retail price of \$1,500 dependent upon vehicle type and size.

Licenses to become an “Official Installer” are available from Globo Hydro Power Limited the parent company commercialising Globo Hydro Power (the product) for \$245 per month, over a 12 month plan – noting that license fees are a claimable taxation expense, thus reducing the cost to your business by up to 30%.

Being an “Official Installer” brings the benefits of:-

- Opportunity to be a Supplier of the newest product offering in the motor and fuel industry, as such improving customer traffic flow into your business.
- “Authorised Installer” status, whereby active referral to your business will be achieved from marketing and promotional campaigns associated with **Globo Hydro Power** – noting Fleet and Corporate Customers hold vehicle numbers in the thousands, indicating large scale potential for **Globo Hydro Power**.
- 1/3 profit share from the cost of an installation, that is \$500 is payable to an “Official Installer” of **Globo Hydro Power** for 1 to 1.5 hours of installation time.
- Access to installation kits from Globo Hydro Power Limited that are not available via any other business source, with kits being delivered to your business premises.

- Workshop signage for promotional purposes.
- Promotional material on **Globo Hydro Power** for distribution to your customers.
- Annual servicing opportunities following sales and installations of **Globo Hydro Power**.
- Membership of the National Institute of Automotive Mechanical Engineers.

And, the additional business opportunity of becoming an “Official Hydrogen Retail Point” for End-Users of **Globo Hydro Power**, as replacement cylinders (like the BBQ swap and go system) of hydrogen will be needed by customers every month (customer loyalty) – sales commission for cylinders is \$5.00 per sale.

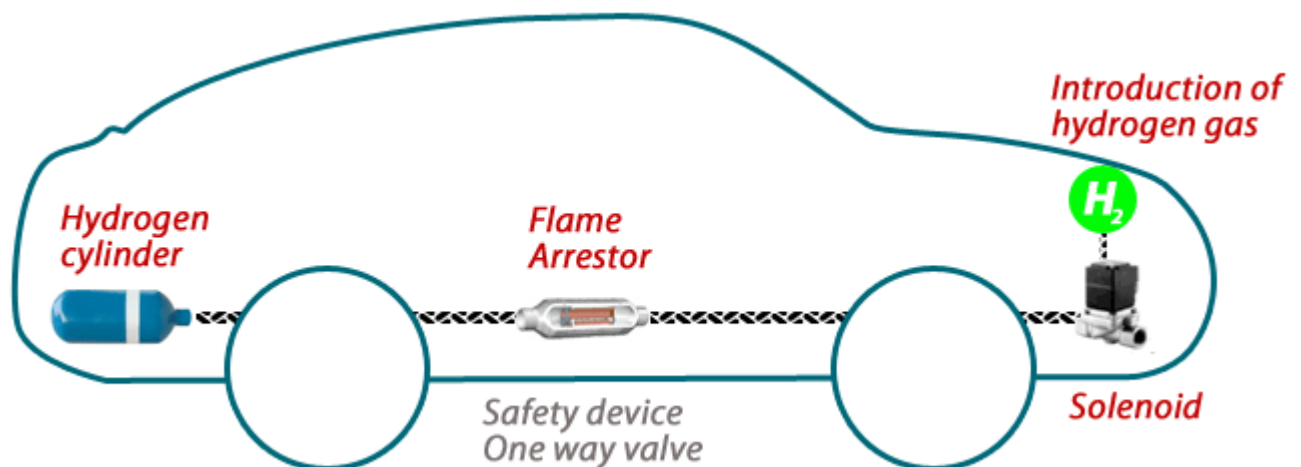

Demand for “Official Installers” is arising now, as customers wanting to take up the benefits of **Globo Hydro Power**, are going to the **Globo Hydro Power** website to find an “Installer” immediately, will your business name be there?

If yes please complete the attached “Registration of Interest” form that follows on from here, and return it to Globo Hydro Power Limited.
